

A Simple Design for a Sundial

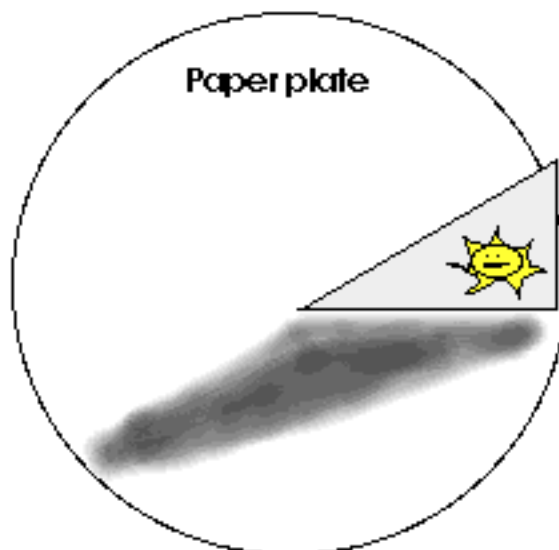

On the right is a pattern you can use to make a gnomon for a sundial. Just photocopy to heavy paper, cut out, and tape to a paper plate.

Plan to take your gnomon outside on the next sunny day.

How is this like the Stickup? How is it different?

This is the edge which should be lined up with edge of plate

SOUTH>

Aim your gnomon towards the south. Soon, you will be able to see the shadow cast by the gnomon onto the paper plate. Mark every hour and you will have made a sundial!
